THE VERGILIAN SUMMER SCHOOL

There is an American school in the heart of the Vergil country of Italy whose object is to promote classical education by providing teachers of Latin and Greek with information, inspiration, and special background for teaching and scholarship.

The Vergilian Summer School, operated by the Vergilian Society of America, was founded in 1938 by the efforts of Mrs. Mary E. Raiola, an American born at sea of German parents seventy-nine years ago, and a group of American and Italian scholars. A center of classical studies for Americans in the Naples area, the school is also aimed at promoting Italo-American relations.

The history of the school since the war echoes the heartaches, hardships, and difficulties that its founders and their successors have experienced for the cause of classical education.

Built upon the remains of an ancient Roman temple dedicated to Mercury, the home base of the Vergilian Society in Italy is the Villa Vergiliana leased to the Society by the Italian government. Near Lake Avernus, Vergil's entrance to the underworld, it lies beneath the Acropolis of ancient Cumae within easy walking distance of the dark, mysterious cave of the Cumaean Sibyl.

Today, through the dedicated efforts of those who have recognized the value of the school,

the Villa provides comfortable living quarters for twenty-five students of Roman antiquity. Skillful administration has made such conditions possible. During his week there last summer, this writer found not only a pleasant, cheerful atmosphere, quiet and conducive to study, but also a delicious and adequate cuisine in the American taste—all at an unbelievably low cost.

The current director of the summer session is the Rev. Raymond V. Schoder, S.J., a thirty-eight-year-old Jesuit priest, now of West Baden College, Indiana, who has been active in rebuilding the school. Through his help and 6,000,000 lire (about \$10,000) from the Italian government, the first students to attend after the war arrived in July 1953.

Father Schoder is a tranquil, well-disciplined man, a good scholar, with a good sense of humor and an unlimited store of knowledge on many subjects ever at his finger tips. He takes delight in suggesting that a climb up a difficult hill might have been made in much less time and with an expenditure of much less energy but at the sacrifice of something that ought not to be missed.

I witnessed an example of his quick wit at Pompeii. A guide, about to lead his tourists into two ancient theaters, explained to them that one was used for tragedy, the other for comedy. Father Schoder turned to his own group and said quietly, "That's an example of one of the reasons for Vergilian Summer School—to pro-

duce people who can correct errors like that."

Stories about guides are many; some of them are quite humorous. Another American Jesuit who was one of my tablemates on the *S. S. Constitution* returning to America related this story which he witnessed during its enactment. At the tomb of St. Cecilia in the catacombs, the guide was asked what is the connection between St. Cecilia and music. He thought carefully for a moment, then, gracefully waving his arms in an expressive gesture, declared without batting an eye, "Her whole life was a symphony."

The Vergilian Summer School conducts three sessions between the beginning of July and the middle of August. In addition to these two-week sessions a special eight-day course is held to accommodate members attending the summer schools at Rome and Athens. Father Schoder, and this year his assistant, conducts guided tours to ancient classical sites in the Naples area. In Cumae, where the school is located, students visit Lake Avernus, the cave of the Cumaean Sibyl (where Father Schoder in sonorous Latin reads the excerpts from Vergil posted in appropriate places) and other sites connected with Vergil. In Naples they make a pilgrimage to what is identified as the tomb of Vergil on the Via Puteolana and the Naples museum rich in ancient Roman remains. Also on the itinerary are Capri (important for the palace of Tiberius from which he ruled Rome), Misenum, Pompeii, Herculaneum, Paestum, Baiae, and Pozzuoli. Last summer the group with which I was rode along the famous Amalfi Drive in a special bus, stopping at the Hotel Diana in Salerno overnight, and visiting the old city of Amalfi, once an independent republic.

Whenever possible native archaeologists personally conduct tours for the school. Last summer we students had the pleasure of the personal guidance of Professor Sestieri who is working at Paestum and other important sites. Arrangements for group travel to Sicily for a stay of from six to twelve days can also be made.

A more detailed account of the program of the summer of 1954 can be found in *CW* 48 (1954-55) 16-17, and in the school's announcements.

The Vergilian Summer School has been conducting a drive to raise \$10,000 in order to meet the debts resulting from the ravages of World War II. Although the Villa remained unimpaired by the occupation forces and the circumstances

of war, the Society's authorities, upon their return after the war, were disheartened to find that civilian plunder left them destitute.

The very latest information available on the drive is that contributions have netted \$6,000, leaving another \$4,000 still to be realized.

Finances make for the school's most serious problem. It is not endowed. Moreover, foundations do not aid schools of the type at Cumae. They are more inclined to endow scientific and social research enterprises. Consequently, the Vergilian Summer School relies entirely upon the generosity of individuals.

If the school can raise the additional money to make the ten thousand dollars needed to pay for furniture purchased, loans for past salaries and bills, equipment, etc., the problem of finance

will then be reduced to the raising of \$5,000 annually to meet expenses.

The authorities of the Society are looking hopefully to friends of the classics everywhere to raise them from debt and make possible the annual subsidy needed for expenses, scholarships and partial subsidies for teachers to enable them to attend the summer program, and a fellowship for the director to cover travel to and from Italy each summer.

People who attend the summer session find it a profitable experience professionally and personally. Take for example the "Culture Vultures," a group of fifty wives of American officers stationed in Naples in 1953. They were so enthusiastic about the session that they entered upon a campaign to raise funds for the school and even persuaded their husbands to accompany them on trips. One of the husbands, Chief of Naval Operations, Admiral Robert B. Carney, former allied Commander of Southern Europe, "came, saw and was conquered." (See *Newsweek*, Aug. 17, 1953.)

A LIST OF CLASSICAL SOCIETIES IN THE UNITED STATES AND CANADA

PRELIMINARY NOTE

The following list, the first, so far as we know, ever undertaken on the present scale, is an attempt to place in perspective the notable work of these organizations of college and secondary school teachers and interested laymen in the preservation of the classical tradition today.

The arrangement is I. (National), II. (Regional), III. State (or Provincial) and Local. Under each organization we have attempted to provide the official title, names and addresses of key officers (indicating by an asterisk (*) individuals to whom we have been specifically advised to refer those in quest of further information), usually a brief statement of the work of the group, and details on membership, dues, and publications. As far as possible the names of officers are those for 1955 or for the academic year 1955-56, but as the compilation of material had to be made largely during the spring months, precisely at the season for election of new officers in many organizations, some changes have undoubtedly occurred. We are confident, however, that inquiries to any officer named will, where necessary, be promptly forwarded. Dues are annual (calendar or academic year) except as indicated.

Some important types of organization have been advisedly omitted from the present list. No mention has been made of the numerous groups in overlapping fields, such as the American Historical Association or the Mediaeval Academy of America, whose membership includes

many classicists at the college and university level; nor, except in a few special cases, of general foreign language societies of interest to both college and secondary school teachers. Likewise we have been obliged to omit at this time organizations basically composed of college or secondary school students, such as the nationally organized Eta Sigma Phi honorary classical fraternity (Executive Secretary: Professor H. R. Butts, Birmingham-Southern College, Birmingham 4, Ala.) and the Junior Classical League (under the auspices of the American Classical League, listed below), as well as independent college and school classical clubs in various institutions. Finally, we have not attempted to enumerate certain foreign or international classical societies with considerable North American membership, such as the Association Guillaume Budé or the (British) Classical Association.

The cooperation of officers and private individuals in supplying prompt and comprehensive information has been most gratifying, and is here cordially acknowledged. Mr. Charles Henderson, Jr., of New York University, rendered valued aid in the initial stages of the project.

EDITORIAL ANNOUNCEMENT

The quite unexpected length of the List of Classical Societies in this issue, and the corresponding expenditure of time entailed in its preparation, must excuse, if possible, both the delay in this final number of Volume 48 and the postponement until fall of several articles and reviews scheduled for this volume.

Expendable surely, but possibly of some interest, was the Editor's formal report on the progress of the Survey Series, now approaching its one-third point. Professor Combella's detailed article on Homer is already on hand, and a considerable number of the rather more than twenty papers still in process are expected to be ready for Volume 49.

important questions can

best be expected here, as in the philological and historical sides of our study, when it is based on a comprehensive acquaintance with the best (and the worst) of what has been essayed on the subject. We have seen little work in this direction.

Our book reviewing and bibliographical commitments, somewhat disorganized during the troubled period early in the year, will be revised over the summer. More use will probably be made of the brief notice type of review, which seems not unexpectedly to have commended itself in many quarters. A supplementary list of Books Received, to be incorporated in the first fall issue, is available on receipt of postage (6c.).

A third attempt will be made to inaugurate the new volume early in October, a date clearly preferable to that to which past schedules have committed us. The fabulous (for academic journalism) dispatch of the Bronxville Printery, Bronxville, N. Y., which enabled us to produce eleven issues in approximately as many weeks in March, April, and May, permits us at least to entertain this hope. In the event this change in publication schedule materializes, subscribers will be notified about mid-September.

To his loyal staff, to the officers of CAAS, to readers and friends of CW at home and away, our sincere thanks and best wishes for a pleasant summer.

POSTSCRIPT

We entertain no illusions, and would have our readers entertain none, about the completeness of these listings. The lack of any central clearing house for information of this sort was evident from the outset, and a certain impression of discontinuity and fugacity in the past reporting of pertinent material seemed at times to emerge from our exploration of such perdurable sources as news items in classical periodicals, entries in educational directories, and the replies generously submitted by state departments of education and similar agencies. In a few cases, considerations of time have prevented researches which might have been productive of more copious information.

Yet the list, provisional as it must be, is an impressive one. It is our hope that the evidence we have accumulated for the existence of a large number of flourishing national, regional, state, and local groups pursuing their important and diversified work will be instructive and stimulating to friends of the classics, possibly leading to the formation of new societies, or the reactivation of old ones, in certain territorial areas or areas of study at present inadequately represented.

Professor Combellack's detailed article on Homer is already on hand, and a considerable number of the rather more than twenty papers still in process are expected to be ready for Volume 49.

Although most of the papers on the major classical authors have been assigned, if not already published, the project has, happily, certain open end aspects. Prospective collaborators are invited to communicate with us during the summer.

We should especially like to hear from those who would engage, on the basis of experience or attested interest in the subject, to prepare comprehensive reports of recent published work on and trends in the teaching of classics in secondary schools. In spite of a considerable amount of interesting original writing in this field, real advancement in the discussion of important questions can

best be expected here, as in the philological and historical sides of our study, when it is based on a comprehensive acquaintance with the best (and the worst) of what has been essayed on the subject. We have seen little work in this direction.

Y., which enabled us to produce eleven issues in approximately as many weeks in March, April, and May, permits us at least to entertain this hope. In the event this change in publication schedule materializes, subscribers will be notified about mid-September.

To his loyal staff, to the officers of CAAS, to readers and friends of CW at home and away, our sincere thanks and best wishes for a pleasant summer.

COLLEGE LATIN

A basic text for a full-year introductory course in Latin for colleges and universities.

by NORMAN DEWITT, JOHN F. GUMMERE, and ANNABEL HORN

The presentation of material and development of concepts in COLLEGE LATIN follow the same plan which has had such wide acceptance and approval in USING LATIN I and II. The college book, however, proceeds more rapidly and includes college-level material to interest and challenge every Latin student.

"One of the most notable works of classical scholarship of this generation."

Juvenal the Satirist

By GILBERT HIGHET

Author of THE CLASSICAL TRADITION

"Professor Highet's readable and scholarly study is the first large modern analysis of the Roman poet whose influence on literature has persisted from the early Middle Ages to our own day . . . [His] clarity of style extends to his translation of scattered passages, and his skill in organizing great masses of critical and descriptive material keeps the reader's attention closely engaged." — *The New Yorker*

"Professor Highet has handled his subject masterfully. He makes you see and feel the Rome of Juvenal's time and unfolds cogently the reasons why Juvenal flayed its vices and aberrations with his violent genius."

—PROFESSOR HENRY T. ROWELL

(Johns Hopkins University), *Baltimore Sun*

"Obviously a major work of scholarship. The prodigious learning that can spin out connections from the whole of Western literature we may expect, or at any rate hope for, in a professorial book. What makes this an extremely good one of its kind is Mr. Highet's clear, crisp style."

— *The New Statesman and Nation*

"Juvenal demands, for his full understanding, more of the talents than are normally united in one person: a wide knowledge of Latin language and literature, of Roman history and social behavior, of the modern European satire he fathered, and above all of human nature. It is in Juvenal's personal character that the key to his work lies; it is to the psychologically acute scholar who is also a humanist that he will yield most of his secrets. In Dr. Highet this paragon has at last been found; there can be little doubt that his book will be the standard work on Juvenal for many years to come." — *Times Literary Supplement* (London)
